

Khadija Magdy Ali

Junior cybersecurity Engineer

Egypt, Dumyat, New Damietta | +201065784251 | khadiga223101167@nmu.edu.eg | [linkedin/khadigamagdy](#)

Summery

Dedicated Software Engineering undergraduate with a strong passion for computer networks and cybersecurity. Currently in the third year of study, graduating in 2027, with practical training experience at CIB Bank and Damietta Port Authority in network systems and infrastructure applications & Developed a solid foundation in Fortinet and Cisco technologies, along with hands-on skills in Python, Linux (Ubuntu & Kali), and network security practices. Completed specialized training in network attacks through the Creativa initiative. Beyond academic coursework, contributed to the research community with papers on deepfake detection and algorithm optimization. Eager to deepen technical expertise and contribute to innovative, security-focused environments.

Education

New Mansoura University, Bachelor in Computer Science	2023-2027
Major: Software Engineering GPA: 3.6	

Projects

Library App | Software Engineering Project

Developed a fully functional library management system as part of a software engineering course. The application featured intuitive UI, search and filtering functionalities, and role-based access for users and admins. The project was praised for its clean architecture, code quality, and user experience by both peers and instructors.

Research Papers | Academic Contribution

Deepfake Detection Using Machine Learning: Conducted research on identifying deepfake media using image analysis and AI techniques. Focused on CNN-based classification models to detect manipulated facial content.

Algorithm Optimization Techniques: Explored and analyzed various algorithmic approaches for improving computational efficiency in data processing applications. Proposed enhancements to sorting and searching strategies.

AI-Powered Customer Support Assistant | AI & Machine Learning Project

Designed and developed an intelligent system to automate and optimize customer service workflows by classifying incoming messages, prioritizing requests, and generating suggested responses in real time.

- Developed a text classification model using TF-IDF vectorization and Logistic Regression to categorize messages (complaints, inquiries, refunds, etc.)
- Implemented a priority detection mechanism (High, Medium, Low) to assist support teams in handling urgent requests efficiently
- Integrated Speech-to-Text functionality to process and analyze voice-based customer interactions
- Built a user-friendly web interface using Streamlit for real-time interaction and system monitoring
- Designed an interactive dashboard for visualizing message distribution, priority levels, and system performance
- Enabled multilingual support (Arabic & English) to improve usability in real-world environments
- Implemented CSV-based data import/export for flexible data handling and testing
- Showcased the project at the Faculty of Computer Science & Engineering exhibition, New Mansoura University

FCAI Student Activities Repository | Web Development Project

Developed a web-based platform to manage and organize student activities at New Mansoura University. The system enables users to register, book activities, view event history, and track schedules through an interactive calendar interface.

- Designed and implemented responsive frontend using HTML, CSS, and JavaScript
- Built modular components for registration, activity booking, and contact functionalities
- Structured the system for future backend integration, including APIs, database connectivity, and authentication
- Modeled system architecture using UML diagrams (use case, sequence, and class diagrams)
- Applied Software Development Life Cycle (SDLC) phases, including requirement analysis, design, implementation, and testing
- Considered security practices such as input validation and password protection
- Planned future enhancements including admin panel, login system, and notification features

Courses

National Telecommunication Institute | NTI

Internship in Fortinet Cybersecurity (*1 Month*) | 2025

Damietta Port Authority – IT Department

Internship in Network Administration & Applications | 2025

Commercial International Bank (CIB)

IT Infrastructure Internship – Networks Division | 2025

Creativa Innovation Hub

Course in Network Attacks & Cybersecurity | 2025

digital egypt pioneers initiative

Infrastructure and Security - Vulnerability Analyst and Penetration Tester | 2026

Skills & abilities

Technical Skills

- Fortinet
- Cisco Basics
- Kali Linux
- Ubuntu
- Python
- Java
- C++
- Html
- Flutter
- Visual Studio Code
- UI/UX principles

Soft Skills

- Problem Solving
- Analytical Thinking
- Time Management
- Team Collaboration
- Leadership
- Self Learning
- Communication

- Presentation Skills
